SUMMARY

Software Engineer at Electronic Arts with 2 years building and maintaining live mobile games (NBA, Madden NFL Arcade). I ship live updates across UI, content, client, and server; drive platform certification and localization; deliver cross-platform releases (Apple Arcade); and build internal C#/.NET tooling — with a full-stack background in React, Node, and MongoDB.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science

May 2020 – May 2024

Vellore, Tamil Nadu

WORK EXPERIENCE

Software Engineer I

Electronic Arts

May 2024 – Present

Hyderabad, India

- Maintain and ship live updates for **NBA**, a live mobile title — triaging and resolving daily bugs across gameplay UI, loading screens, in-game maps, content, client, and server to keep the live build stable for players.
- Drive **platform certification compliance** — resolve cert/failure reports and deliver release-ready builds across platforms.
- Led **localization enablement on Madden NFL Arcade**, refactoring non-localized builds to support localization for international release; built the **Apple Arcade** store version with other engineers.
- Developed features for an internal **C#/.NET (WPF)** content-delivery tool — including inline text editing — to streamline content workflows for the team.
- Earlier in role, built a **C#/Unity automation framework** for titles including Plants vs. Zombies 3 and Star Wars (swipe gestures, runtime data extraction, tap interactions) to automate gameplay testing.
- Partner with the **DRE** team to keep **Jenkins CI** pipelines green and with **QV/QA** to resolve binding, client, and server-side issues across environments.

Software Engineer Intern

Electronic Arts

Jan 2024 – May 2024

Hyderabad, India

- Developed a mini-game for Dash Adventure, shipping new features into a large existing codebase.
- Released monthly live events through a pipeline system — populating the admin panel and implementing the Unity changes to reflect each event in-game.

Frontend Lead

Powstik

May 2022 – Jul 2022

Bengaluru, India

- Led React front-end delivery and team workflows, ensuring on-time project delivery in a collaborative environment.

Full-Stack Developer

Aitra Pvt. Ltd.

Jul 2021 – Dec 2021

Noida, India

- Built full-stack features with React and Node.js — creating landing pages and the desktop version of the mudda.in website.

PROJECTS

TPS Shooter | Unity, C#

- Built a mobile third-person shooter with player & enemy AI, dynamic gun/bullet and grenade systems, Cinemachine zoom-aim, power-ups, inventory, mini-map, terrain building, and a local save system.

Random Chatting App | React, Node.js, MongoDB, Socket.IO

- Built a real-time group/direct-message chat app with Socket.IO; deployed on AWS for scalable, reliable performance.

TECHNICAL SKILLS

Languages: C#, .NET, C/C++, Python, JavaScript, HTML/CSS, SQL

Frameworks: Unity, Unreal, WPF, React, Node.js, MongoDB

Developer Tools: Git, Perforce, Jenkins, GitHub Copilot, VS Code, Visual Studio, JetBrains IDEs

ACHIEVEMENTS

- **Micron Hackathon** — 2nd place for a sustainable-development waste-management solution.
- **Kavach Hackathon** — 7th in the university for a "Fake News Detection System" presentation.
- **Microsoft Engage** — Selected for the program; built a project under a mentor's guidance.
